Environmental Data Program

Enhance sustainability with Altivar™ Soft Starter ATS430

Superior environmental performance thanks to high durability

Altivar™ Soft Starter ATS430 is RoHS and REACH compliant

- Transparent environment information
- Life Cycle Analysis, compliant with ISO 14025
- Circularity profile

Altivar Soft Starter ATS430 brings key benefits to help you achieve **superior sustainability** thanks to **high-durability performance**:

- by increasing the reliability of the system to maximize process continuity and operations
- by allowing hardware and firmware upgradability to extend the service life of the equipment and keep it up to date
- by providing repairability and diagnostics to minimize downtime

Durability = Reliability + Upgradability + Repairability

Benefits

- Maximize machine **uptime**
- **Best-in-class motor control**
- **Reduce overall cost** thanks to embedded functions
- Enhance **sustainability**
- **Optimize time** from design to operation

Altivar™ Soft Starter ATS430 is designed for high-durability performance

Visit the Altivar Soft Starter ATS430 web pages on se.com to access environmental data

Reliability

The Altivar Soft Starter ATS430 has been designed to deliver enhanced reliability to **withstand high stress**, whatever the origin - whether thermal mechanical, chemical, or operational - to reduce downtime.

Additionally, the ATS430 integrates **cybersecurity best practices** that help to protect against casual or coincidental violation.

To avoid unplanned downtime, the ATS430 also **embeds condition monitoring** features to detect deviation at an early stage and provide proactive condition-based maintenance.

Upgradability

You can **upgrade ATS430 firmware** using SoMove or EcoStruxure Automation Device Maintenance software. Available on the Schneider Electric website, the firmware is digitally signed and its authenticity is verified by the ATS430. This operation can only be performed by authorized people as defined in the cybersecurity policy.

Repairability

The Altivar Soft Starter ATS430 is designed to simplify on-site maintenance and repair processes thanks to integrated **diagnostic** functions, **spare parts** available from stock, and fast, **documented replacement** operations.

In addition, Schneider Electric implements a **circular model**, offering replacement with repaired or reconditioned products so that your asset can be put back into service quickly.

Schneider Electric's IoT-enabled, plug-and-play, open, secure, interoperable architecture and platform, in Industries, Infrastructures, Data Centers, and Buildings.

Innovation at every level

EcoStruxure is based on a three-tiered technology stack delivering innovation at every level, from connected products to edge control and apps, analytics, and services.

Together with our hybrid segments approach, this enhances your value around safety, reliability, operational efficiency, sustainability, and connectivity across 6 domains of expertise:

- Power
- IT
- Building
- Machine
- Plant
- Grid

Dedicated architectures and IoT

We tailor our solutions in the form of dedicated reference architectures for plants:

- Management systems
- Power systems
- Data center systems
- Industrial plant and machine systems
- Smart grid systems

The Industrial Internet of Things (IIoT) gives an additional boost to technologies. That's why we provide our customers with an IoT-enabled architecture and platform offering simple, reliable, productive, and cost-efficient solutions.

Cybersecurity solutions

Robust cybersecurity protection is a must, and Schneider Electric's solutions can deliver it, regardless of business type or industry.

The vendor-agnostic services provided by our skilled professionals help to protect your entire critical infrastructure. We help to assess your risk, implement cyber-specific solutions, and maintain your onsite defenses over time, while integrating appropriate IT policies and requirements.

This is our difference and your advantage.

Enhanced safety

With the release of M580 Safety, Schneider Electric further expands the EcoStruxure platform.

This consolidates our position as one of the most trusted industrial safety vendor, with thousands of Modicon and Triconex safety systems protecting the most critical industrial processes globally.

EcoStruxure™ for Industry
Innovation At Every Level

*The Schneider Electric industrial software business and AVEVA have merged to trade as AVEVA Group plc, a UK listed company. The Schneider Electric and Life is On trademarks are owned by Schneider Electric and are being licensed to AVEVA by Schneider Electric.

Altivar Soft Starter ATS430

Soft starters for asynchronous motors

The essential for effectiveness

Best-in-class motor control and high-durability performance

Altivar Soft Starter ATS430 range

Effective motor management

Altivar Soft Starter ATS430 is the new comprehensive range of soft starters from Schneider Electric for standard industrial machines. It provides functions for effective motor management, including operational performance, reliability, protection, integration in the automation system, and energy efficiency.

Altivar Soft Starter ATS430 had been designed to deliver:

- Best-in-class motor control
- High-durability performance to reduce downtime and extend lifespan
- Superior sustainability through energy efficiency and resources preservation
- Cost reduction at each phase of the life cycle

ATS430 covers the operational voltage range from 208 to 600 V in a single product range from 17 up to 590 A to meet the requirements of the most stringent applications in normal duty. The range embeds best practice cybersecurity functions helping to protect operations, and integrates condition monitoring of its most sensitive parts.

Best-in-class motor control

ATS430 integrates TCS, the original torque control system from Schneider Electric that helps to ensure smooth acceleration/deceleration and preserve the mechanics and hydraulics. Monitoring of the motor, application, power, and energy is built-in: all the data is available to users and the automation system.

High-durability performance

Altivar Soft Starter ATS430 is designed to help ensure operational continuity. The high-durability performance of ATS430 allows downtime and operational expenditure to be reduced and equipment lifespan to be extended. Durability encompasses:

- Reliability
- Upgradability
- Repairability

Reliability by design

ATS430 withstands high stress from several sources, whether environmental or operational. It offers enhanced robustness in terms of:

- > Thermal conditions, with an extended operating ambient temperature range from -25 to 60 °C / -13 to 140 °F (with derating above 40 °C / 104 °F)
- > Mechanical conditions, by using a long-lasting power connection with integrated EverLink™ technology and complying with class 3M3 and class 3S3 according to IEC 60721-3-3 ed. 2002
- > Chemical conditions, by complying with class 3C3 according to IEC 60721-3-3 ed. 2002 with salt mist
- > Electrical conditions, thanks to a large mains voltage range from 208 to 600 V and a large mains frequency range from 50 or 60 Hz +/-20%

Torque control, the boost function, and the ATS430 starting capabilities all help to increase the withstand to stress originating from the application.

Cybersecurity best practices

As limiting events resulting in downtime can also be caused by operators, the Altivar Soft Starter ATS430 embeds best practice cybersecurity functions covering:

- > User account management, including user authentication, role-based authorization, access channels, and strong passwords
- > Hardening to restrict ports, functions, or services
- > Threat intelligence to manage cybersecurity-related events
- > Cybersecure firmware upgrade

High-durability performance (continued)

Integrated condition monitoring

To avoid unplanned downtime and move to a proactive maintenance strategy, Altivar Soft Starter ATS430 embeds early detection of deviation in operation of its most sensitive parts:

- > Monitoring of cooling fans based on operation time and rotation speed
- > Monitoring of bypass relays based on cycle counter and life cycle rate

The operator is alerted by flashing of the associated LED on the front panel. An output relay can also be assigned to this function.

Upgradability

It is easy to extend the lifetime of the equipment with ATS430 and keep it up to date thanks to the firmware upgrade.

- > Up-to-date firmware is available on the Schneider Electric website.
- > A firmware upgrade can be performed directly by customers with SoMove or EcoStruxure Automation Device Maintenance software through a Modbus serial port.
- > Firmware upgrades follow the cybersecurity rules in terms of authorization and authenticity.

Repairability

To reduce the mean time to repair and therefore increase machine uptime, Altivar Soft Starter ATS430 offers:

- > Easy diagnostics thanks to direct access to online help via the QR code sticker on the ATS430 front panel, and use of the error code on the built-in display to open the corresponding troubleshooting documentation
- > Wear parts, such as fans and control block, available with documented operations for easy replacement by the user
- > Spare parts, such as bypass contactor, power board, and thyristors, for replacement by Schneider Electric after-sales service

In addition, Schneider Electric implements a circular model, offering replacement with repaired or refurbished products.

Fan kit VZ3V4903 for ATS430C21S6...C59S6

Improved efficiency

Energy efficiency and management

- > Efficiency higher than 99.5%
- > Integrated bypass
- > Power monitoring with accuracy better than 95%: active and reactive power, active and reactive energy, current, voltage, power factor
- > Power quality monitoring: voltage sag, voltage and current unbalance

Energy management capabilities are provided thanks to integration in EcoStruxure Power Monitoring Expert, by combining power and energy data provided by the ATS430 and process data according to different standpoints.

High environmental performance

- > Use of plastic with at least 20% bio-based content
- > Use of ASI-certified aluminum for responsible production, sourcing, and material stewardship
- > Packaging using recycled cardboard

Environmental data

ATS430 meets the following requirements:

- > Use of hazardous substances
 - Compliance with the European RoHS directive (2011/65/EU and 2015/863/EU) and RoHS China
 - Compliance with REACH regulation No. 1907/2006 for the declaration of substances of very high concern (SVHC), authorization (Annex XIV), and restriction (Annex XVII)
- > Environmental impact

The Product Environmental Profile (PEP) is a quantitative Type III Environmental Declaration in compliance with ISO 14025 that helps to ensure appropriate reliability and transparency. Based on a Life Cycle Assessment (LCA) of the product along its whole life cycle, the document presents the different impacts, such as energy consumption, carbon footprint, consumption of raw materials, and pollution of air, water, and soil.
- > End-of-Life management

The "ATS430 End-of-life" information document in accordance with IEC 62635 guidance contains the instructions for responsible disposal of the products and maximizes recycling in a step towards a more circular economy, improving operational efficiency and reducing environmental hazards.

Please consult the Altivar Soft Starter ATS430 product pages on our website to access the environmental data of the given reference: environmental and carbon footprint data, material and substances data, energy efficiency data, lifetime extension, repacking and remanufacturing data.

Contributing to overall cost reduction

Reduce engineering time and cost

With EcoStruxure solutions, the engineering time is drastically reduced:

- > It takes just two minutes to select the complete soft starter solution with EcoStruxure Motor Control Configurator: no need to be an expert
- > The power architecture is optimized with EcoStruxure Motor Management Design, which analyses different solutions
- > ATS430 is integrated in EcoStruxure Power Monitoring Expert for energy management
- > Small motor tests can be run to check the complete sequence

Reduce the cost of the solution

Altivar Soft Starter ATS430 incorporates functions that eliminate the need to use and integrate external devices:

- > No need for external instrumentation for energy management with the embedded power monitoring and power quality functions
- > No need for external bypass contactor and wiring thanks to the embedded bypass relays
- > Motor thermal monitoring with PTC probes
- > Simple Modbus wiring through open-style terminals

Reduce your operational expenditure (OpEx)

Altivar Soft Starter ATS430 is designed to reduce the Mean Time to Repair (MTTR) and:

- > Reduce your energy bill:
 - High efficiency level of ATS430 (99.5%) thanks to integrated bypass
 - Embedded power and energy monitoring and management
- > Increase uptime with a high-durability device
- > Reduce maintenance cost by moving from reactive maintenance to condition-based maintenance thanks to the embedded condition monitoring of the soft starter and the driven equipment
- > Help protect your process integrity against casual or coincidental violations thanks to the embedded best practice cybersecurity functions

Altivar Soft Starter ATS430

Soft starters for asynchronous motors

Applications, functions, and EcoStruxure integration

Machines for industrial applications

Altivar Soft Starter ATS430 is specifically designed to meet the requirements of normal duty applications in standard industrial machines such as:

- Centrifugal pumps
- Fans
- Screw compressors
- Centrifugal compressors
- Conveyors
- Agitators
- Mixers

The Altivar Soft Starter ATS430 range increases durability and availability of your machines, helps to ensure continuous operations, and reduces downtime thanks to its:

- Torque Control System (TCS)
- Simplicity
- Reliability
- Integrated bypass relays
- Condition monitoring functions
- Cybersecurity features
- Repairability

Functions

The Altivar Soft Starter ATS430 range masters the acceleration and deceleration of normal duty applications while reducing mechanical wear and fluid shocks in hydraulic machines.

Additional functions:

- Up to 700% motor current starting without tripping
- Boost function to override locked shaft and friction
- Motor preheating

Full set of functions to monitor:

- The motor: overload, ground fault
- The application: underload and overload, phase rotation, starting time
- The mains: phase loss, phase rotation, phase inversion

Integration in EcoStruxure software

The Altivar ATS430 soft starter is integrated in EcoStruxure software to save time and improve project efficiency with:

- EcoStruxure Motor Management Design for power architecture design and selection of the solution
- EcoStruxure Motor Control Configuration for selection of the complete motor starter solution including circuit breakers and contactors
- EcoStruxure Power Monitoring Expert for energy management using power and energy data reported by the ATS430
- EcoStruxure Architecture Builder for definition of the automation architecture and the detailed design, including the Bill of Material and quotation

Altivar Soft Starter ATS430

Soft starters for asynchronous motors

The offer

The offer

The Altivar Soft Starter ATS430 is a controller with four thyristors using the TCS (torque control system) algorithm to control acceleration, deceleration, and stopping of three-phase squirrel cage asynchronous motors up to 400 kW/500 HP.

- The ATS430 is a cost-effective solution designed to:
 - Reduce machine operating costs by reducing mechanical stress and improving machine availability
 - Reduce the risk of severe damage by reducing fluid shocks and improving installation availability
- Reduce the stress on the electrical distribution system by reducing line current peaks and voltage drops during motor starts
- Reduce the installation cost thanks to the integrated bypass relays
- Improve reliability of your asset thanks to embedded features such as condition monitoring and cybersecurity

Altivar Soft Starter ATS430 consists of one range only covering:

- Operational voltage from 208 to 600 V
- Operational current from 17 to 590 A
- Control power supply from 110 to 230 VAC

ATS430 integrates two Modbus serial lines as standard:

- One Modbus serial line available on an RJ45 port for:
 - Connection to configuration and firmware update software
 - Connection of a remote display terminal
 - Connection to a Modbus fieldbus
- One Modbus serial line available on open-style terminals for connection to a Modbus fieldbus

Altivar Soft Starters ATS430 has an integrated display terminal that allows the user to change the configuration and settings, or monitor parameters related to the application, motor, or soft starter.

Altivar Soft Starter ATS430

Soft starters for asynchronous motors

The offer (continued)

The offer (continued)

Reliability by design

Altivar Soft Starter ATS430 is designed for harsh environments.

- Ambient operating temperature:
 - -25...+40 °C/-13...104 °F without derating, up to 60 °C/140 °F with derating of 1% per °C above 40 °C/104 °F
- Relative humidity without condensing: 5...95%
- Storage and transport temperature: -40...+70 °C/-40...+158 °F
- Withstand to harsh environments:
 - Conforming to IEC/EN 60721-3-3 ed. 2002
 - Chemical substances class 3C3 with salt mist
 - Mechanical substances class 3S3
 - Mechanical conditions class 3M3
 - Printed circuit boards with protective coating
- Operating altitude:
 - 0...2,000 m/0...6,562 ft without derating
 - 2,000...4,800 m/6,562...15,748 ft with derating of 1% per 100 m/328 ft
 - Altitude also has an impact on the overvoltage category of the supply source (see the "System earthing arrangement and mains voltage" section below).

System earthing arrangement and mains voltage

To comply with IEC 60947-2, the system earthing arrangement, the mains voltage used on the ATS430 soft starter, and the altitude define the overvoltage category of the supply source.

Mains voltage	System earthing arrangement	Supply source overvoltage category, up to 4,800 m/15,748 ft
208...600 V	TT or TN	OVCIII
	IT or corner grounded	OVCIII

The supply source overvoltage category could be reduced by using an appropriate system such an insulation transformer.

Installation

ATS430 soft starters are intended to be mounted in a cabinet. The protection degree of the products is as follows:

- IP20 for current rating from 17 to 110 A
 - IP00 for current rating from 140 to 590 A
- The units rated from 140 to 590 A have unprotected power terminals. These terminals can be fitted with protective covers (see [page 34](#)) to obtain an IP20 solution. The protective covers are to be used with eyelet connections.

Electromagnetic compatibility (EMC)

Compliance with electromagnetic compatibility requirements has been incorporated into the design of the Altivar Soft Starter ATS430 to help ensure equipment meets CE marking requirements.

Conducted and radiated emissions according to IEC 60947-4-2 class A applies to the whole ATS430 range.

Certification

The Altivar Soft Starter ATS430 range has the following certifications: cULus, CE, UKCA, CCC, EAC, and RCM.

Marking: CE, cULus, CCC, RCM, EAC, and UKCA.

Altivar Soft Starter ATS430 equipped with optional protective covers

Altivar Soft Starter ATS430

Soft starters for asynchronous motors

Integrated functions

Integrated functions

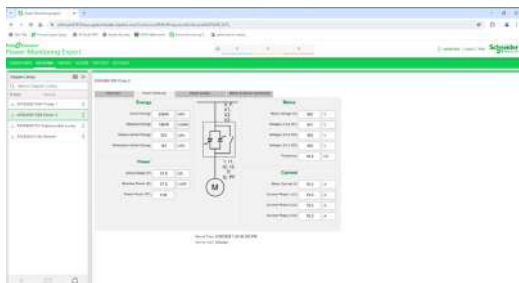

The Altivar Soft Starter ATS430 includes numerous functions related to monitoring, the application, and start/stop performance, including:

- TCS, the original torque control system: constant control of the torque supplied to the motor during acceleration and deceleration phases (significantly reducing pressure surges)
- Bypassing function of the thyristors, managed by the integrated relays, at the end of a start period whilst maintaining electronic protection
- Wide frequency tolerance for generator set power supplies
- Wiring diagnostics functions: small motor test

Condition monitoring

The Altivar Soft Starter ATS430 embeds condition monitoring functions to improve uptime and reduce the maintenance cost of your assets:

- Condition monitoring of the embedded cooling fans
- Condition monitoring of the integrated bypass relays

Power and energy monitoring

The Altivar Soft Starter ATS430 is equipped with nine measuring sensors (six voltage sensors and three current sensors) with better than 95% accuracy, monitoring each phase at mains supply and motor level:

- Power metering
 - Active energy and reactive energy
 - Active power and reactive power
 - Mains voltage (global and phase-to-phase) and frequency
 - Motor current (global and per phase)
- Power quality
 - Current unbalance
 - Voltage unbalance and voltage sag

Motor and mains monitoring

- Built-in motor thermal monitoring
- Motor thermal state with connection of a PTC probe
- Time before restart
- Phase rotation
- Phase loss
- Mains loss
- Excessive starting time locked rotor
- Overloads, underloads, overcurrent, and undercurrent during continuous operation
- Main phase inversion

Application functions

- Smoke extraction
- Boost
- Torque limitation
- Motor preheating
- Forced local mode
- Automatic restart

Cybersecurity best practices for your assets

Cybersecurity best practices

Altivar Soft Starter ATS430 embeds cybersecurity features as standard. These features contribute to the enhanced protection of your machines against casual or coincidental violations from insiders, such as well-intentioned yet careless employees or contractors with no cybersecurity attack skills, which represent 60% of cyberattacks.

Cybersecurity features help to:

- Enforce authorization of users through:
 - User profile assignment
 - User authentication
 - Administrator ability to override user authorization
 - Strong password
 - Password encrypted in a non-reversible way
 - Authorization managed according to channels
 - After-sales services authorization
- Restrict and disable functions or services:
 - Sign-in required after a configurable period of inactivity
 - Prohibit or restrict the use of communication ports and related services such as protocols, I/O scanner, commissioning software
 - Counter brute force attacks by blocking repeat login attempts
 - Cybersecurity events recorded in a dedicated database
 - Reports include user's name, type of operation, time stamp
 - Alert when storage capacity is approaching
 - Storage capacity up to 500 logins
 - 10-year battery life, alert when low battery is approaching
- Protect authenticity of the firmware through:
 - Digitally signed firmware
 - Cryptographic firmware keys
 - Original firmware stored in location
 - Verification of firmware validity on each power-up
 - Verification of operation of the ATS430 soft starter
- Increase the hardening robustness of the device
 - After-sales services management

Cybersecurity settings can be exported from the ATS430 as an individual file that can be saved and duplicated by transfer to other ATS430 devices.

Altivar Soft Starter ATS430

Soft starters for asynchronous motors

Integration, dialog and configuration tools

Dialog interface solutions for ATS430

Integration

Embedded fieldbus protocol

- Modbus serial link with RJ45 port **1**
 - Standard Modbus
 - Connection of configuration and runtime tools
 - Control of the Altivar Soft Starter ATS430 in automation architectures (PLCs, IPCs, HMIs, etc.) in Modbus protocol for reading/writing data: diagnostics, supervision, and fieldbus management functions
- Modbus serial link with open-style port **2**
 - Standard Modbus
 - Control of the Altivar Soft Starter ATS430 in automation architectures (PLCs, IPCs, HMIs, etc.) in Modbus protocol for reading/writing data: diagnostics, supervision, and fieldbus management functions

Dialog and configuration tools

The Altivar Soft Starter ATS430 is supplied as standard with a plain text display terminal and four buttons for menu navigation and incremental entry of settings integrated into the front panel of the device.

An additional removable remote terminal can be connected to the device's Modbus RJ45 serial port. This can be:

- a plain text display terminal with an IP43 door mounting **3** (see [page 25](#))
 - a graphic display terminal with an IP65 door mounting **4** (see [page 27](#))
- These options provide an operator interface outside the cabinet and raise the level of usable functionality.

- The integrated plain text display and keys are used for:
 - ATS430 control, adjustment, and configuration
 - Diagnostics
 - Displaying current values (motor, I/O, etc.), notifications, and warning messages
- The optional door-mounted plain text terminal offers more services such as:
 - Configuration storage and download
 - Duplication of the configuration of a powered-up ATS430 onto another powered-up ATS430
- The optional door-mounted graphic display terminal offers additional high-level services such as:
 - Copying configuration files from a PC or an ATS430 in the graphic display terminal and duplicating them on other ATS430 (the soft starter must be powered-on for the duration of the duplication operation)
 - Access to digital portal via dynamic QR code
 - Connection to several Altivar Soft Starters using multidrop link components
 - Enhanced remote visibility of a detected error by switching the backlight color from white to red

The Altivar Soft Starter ATS430 is supported by SoMove software, which covers all Altivar drives and soft starters.

SoMove software provides advanced functions for configuration, setup, and maintenance of the Altivar Soft Starter ATS430.

SoMove software

Altivar Soft Starter ATS430

Soft starters for asynchronous motors

Service features

Firmware update with SoMove software

Integrated service features

Altivar Soft Starter ATS430 provides built-in service features to help achieve optimum time savings:

- Native simplicity to set up and start
- Simplified communication with integrated Modbus serial communication
- Secure firmware update:
 - Firmware version available on se.com from the Altivar Soft Starter ATS430 web page
 - Single device firmware update using SoMove
 - Mass firmware update deployment using EcoStruxure Automation Device Maintenance
 - Applying the new firmware can be automatic or manual
 - Applying a new version is only possible when the Altivar Soft Starter ATS430 has validated the digital signature of the firmware. If this is not the case, the ATS430 will restart on the firmware version that was previously installed.
 - Firmware update is available on ATS430 products and optional plain text terminal and graphic display terminal languages.
- Three types of QR code are available:
 - QR code located on the front face of the product, to access the:
 - digital Customer Care Center application
 - product data sheet
 - ATS430 ID card and documentation
 - Dynamic QR code generated when an error is detected (red screen):
 - Identification of the detected error and link to a description of probable cause and possible corrective actions
 - Custom QR codes with links to your own support pages

Scanning the QR code from a smartphone or tablet

Selection criteria for Altivar Soft Starter ATS430

- The mains voltage
- The rated motor power and rated motor current
- The type of application: normal duty

Examples of normal duty applications for Altivar ATS430 soft starter

In the table below you will find applications categorized as normal duty, which are given as examples only.

Application	Limiting current	Acceleration	Initial starting torque	Type of stop
	% of motor nominal current	Seconds	% of nominal torque	
Centrifugal pump	450	5 to 15	0	Deceleration
Submersible pump	450	Up to 2	0	Deceleration
Piston pump	525	5 to 10	30	Deceleration
Fan	450	10 to 40	0	Freewheel
Cold compressor	450	5 to 10	30	Deceleration
Screw compressor	450	3 to 20	30	Deceleration
Centrifugal compressor	450	10 to 40	0	Freewheel
Piston compressor	525	5 to 10	30	Deceleration
Conveyor, transporter	450	3 to 10	30	Deceleration
Agitator	525	5 to 20	10	Deceleration
Mixer	525	5 to 10	50	Deceleration

Motor thermal protection curves (from cold state)

A normal duty application corresponds to motor protection class 10E.

Starting capabilities of ATS430 according to the service duty

From an application standpoint, the overload is defined depending on the service duty of the motor, S1 (continuous operation) or S4 (intermittent operation), according to the following table:

Service type	Overload (starting)		Service cycle No. of starts/h	Service factor
	Overcurrent	Duration		
Normal duty				
S1	4 x I _n 3 x I _n	23 s 46 s	Continuous operation after starting	
S4	4 x I _n 3 x I _n	13 s 23 s	ATS430D17...C17S6: 10 ATS430C21...C59S6: 6	50%

Motor service duty S1

Motor service duty S4

Selection of ATS430 commercial reference

Once the appropriate application has been validated based on the above elements, select the soft starter from [page 22](#) according to the supply voltage and the motor power. Check that the rated motor current is lower than the operational current of the ATS430.

The Altivar Soft Starter ATS430 is designed to respect the above operations (see previous page) without triggering an overheat error at 40 °C/104 °F max. and at an altitude of 2000 m/6562 ft. Above those limits, the operational current of the soft starter needs to be derated as follows:

- Derating of 1% per °C above 40 °C/104 °F up to 60 °C/140 °F
- Derating of 1% per 100 m/328 ft up to 4,800 m/15,748 ft

Breakdown of ATS430 product reference:

For example, for the reference ATS430C17S6, the current rating is 170 A (17 x 10). The current rating is defined as the rated operational current in normal duty, in-line, at 40 °C/104 °F.

Special uses

Other use cases that influence the selection of the Altivar Soft Starter ATS430 are outlined below.

Motors in parallel

Motors may be connected in parallel provided that the power limit of the soft starter is not exceeded (the sum of the motor currents must not exceed the nominal current of the soft starter selected depending on the type of application) and that thermal protection by sensors is provided on each motor.

Brush motor

The Altivar Soft Starter ATS430 can operate with a bypassed rotor resistance motor or with a resistance lug. The starting torque is modified in accordance with the rotor resistance. If necessary, maintain a low resistance to obtain the required torque to overcome the resistive torque on starting.

A bypassed brush motor has a very low starting torque. A high stator current is required to obtain sufficient starting torque.

Select an ATS430 soft starter with a limiting current equal to or higher than seven times the motor nominal current. Note: Check that the starting torque capability of the soft starter, equal to seven times of its rated current, is greater than the resistive torque.

Note: The ATS430 torque control enables excellent soft starting despite the limiting current being seven times the rated current required to start the motor.

Very long motor cable

Very long motor cables cause voltage drops due to the resistance of the cable. If the voltage drop is significant, it could affect the current consumption and the torque available. Therefore, this must be taken into account when selecting the motor and the soft starter.

Soft starters in parallel on the same line supply

If several soft starters are installed on the same line supply, line chokes should be installed between the transformer and the soft starter (see [page 34](#)).

Restricted use

- Do not connect the Altivar Soft Starter ATS430 inside the motor delta.
- Do not connect the ATS430 to loads other than motors (for example, transformers and resistors are not allowed).
- Do not connect power factor correction capacitors to the terminals of a motor controlled by an Altivar Soft Starter ATS430.

Integrated plain text display terminal

Integrated plain text display and input keys

The integrated plain text display and input keys are used to:

- Control, adjust, and configure the ATS430
- Display current values (motor, I/O, and machine data)

Other features:

- Two-line display
- Languages (Chinese, English, French, German, Italian, Korean, Russian, Spanish, Traditional Chinese, Turkish)
- White backlit LCD screen
- Sensitive-effect buttons

Description

The integrated display and input keys comprise:

- 1 LCD backlit screen
- 2 ESC button: aborts a value, parameter, or menu to return to the previous selection
- 3 Up/Down buttons: increases/decreases a value, scrolls through lines
- 4 OK button: saves the current value (ENT), selects the menu
- 5 RUN button: local control of motor run command
- 6 STOP/RESET button: local control of motor stop command/clearing detected errors

An additional removable remote terminal can be connected to the device's Modbus RJ45 serial port. This can be:

- a plain text display terminal with an IP43 door-mounting solution (see [page 25](#))
- a graphic display terminal with an IP65 door-mounting solution (see [page 27](#))

These options provide an operator interface outside the cabinet and raise the level of usable services.

Plain text display terminal VW3A1113

Plain text display terminal

The plain text display terminal can be ordered separately for mounting on a cabinet door with an IP43 solution, using a mounting accessory and a remote connection to the ATS430.

This terminal is used to:

- Control, adjust, and configure the ATS430
- Display current values (motor, I/O, and machine data)
- Store and download configuration (one configuration file can be stored)
- Duplicate the configuration of an ATS430 on another ATS430

Other features:

- Two-line display
- Languages (Chinese, English, French, German, Italian, Korean, Russian, Spanish, Traditional Chinese, Turkish)
- White backlit LCD screen
- Operating range: $-15...60\text{ }^{\circ}\text{C}/+5...140\text{ }^{\circ}\text{F}$
- Removable, easy plug-in with RJ45 port

Description

The front of the display terminal comprises:

- 1 LCD backlit screen
- 2 OK button: saves the current value (ENT), selects the menu
- 3 RUN button: local control of motor run command
- 4 STOP/RESET button: local control of motor stop command/clearing detected errors
- 5 ESC button: aborts a value, parameter, or menu to return to the previous selection
- 6 Home: root menu
- 7 Turn \pm : navigation dial, increases or decreases a value, scrolls through lines

PF142251

Remote-mounting kit VW3A1114 (rear view)

Mounting kit for plain text display terminal

Remote-mounting kit for mounting on an enclosure door with IP43 degree of protection as standard.

Description

The kit comprises:

- Tightening tool (also sold separately under the reference ZB5AZ905)
- 1 Mounting plate
- 2 RJ45 port for the plain text display terminal
- 3 Seal
- 4 Fixing nut
- 5 RJ45 port for connecting the remote-mounting cordset

Cordsets should be ordered separately depending on the length required.

Drilling a hole with a standard Ø 22 tool, as used for a pushbutton, allows the terminal to be mounted without the need for a cut-out in the enclosure.

When the kit is locked tightly onto the panel by the nut, the gasket on the back cannot rotate.

Contextual instantaneous access to online help

Red backlight automatically activated on detection of an error

Graphic display terminal VW3A1111

Graphic display terminal

The graphic display terminal can be ordered separately for mounting on a cabinet door with an IP65 solution, using a mounting accessory and a remote connection to the ATS430.

This terminal can also be connected to:

- A PC to exchange files via a Mini USB/USB connection (1)
- Several Altivar devices in multipoint mode

This terminal is used to:

- Control, adjust, and configure the ATS430
- Display current values (motor, I/O, and machine data)
- Display graphic dashboards such as the energy consumption monitoring dashboard
- Store and download configurations (several configuration files can be stored)
- Copy the configuration from one ATS430 and duplicate it to other ATS430 devices
- Load configurations from a PC and duplicate them on Altivar devices

Other characteristics:

- Up to 24 languages (complete alphabets) covering most countries around the world (languages can be removed, added, and updated according to user needs; please consult our [website](#))
- Two-color backlit display (white and red). If an error is detected, the red backlight is automatically activated (function can be disabled)
- Operating range: -15...60 °C/5...140 °F
- Trend curves: graphic display of changes in monitoring variables over time

Multipoint screen

In most cases, the graphic terminal is connected point-to-point with an ATS430. However, communication is possible between a graphic display terminal and several Altivar soft starters and Altivar drives (ATV340, ATV600, and ATV900) connected on the same Modbus serial fieldbus via the RJ45 port (HMI or Modbus serial). In this case, multipoint mode is automatically applied to the graphic display terminal.

A maximum of 32 Altivar devices can be connected on the same Modbus serial fieldbus.

Apart from the Stop function linked to the STOP/RESET key, multipoint mode cannot be used to apply a reset after an error has been detected or control the drive via the graphic display terminal: in multipoint mode, the Run key and the Local/Remote key are disabled.

Description

The front of the graphic display terminal comprises:

- 1 8-line, 240 x 160-pixel screen, to display bar charts, gages, and trend charts
- 2 4 function keys to facilitate navigation and provide contextual links for enabling functions
- 3 STOP/RESET button: Local control of motor stop command/clearing detected errors
- 4 RUN button: Local control of motor run command
- 5 Navigation buttons:
 - OK button: saves the current value (ENT), selects the menu
 - Turn ±: navigation dial, increases or decreases a value, scrolls through lines
 - ESC button: aborts a value, parameter, or menu to return to the previous selection
 - Home: root menu
 - Information (i): contextual help

Accessories for graphic display terminal

Remote-mounting kit for mounting on enclosure door with IP65/UL Type 12 degree of protection as standard.

Description

The kit includes:

- Tightening tool (also sold separately under the reference ZB5AZ905)
- 1 Cover plate to maintain IP65 protection when there is no terminal connected
- 2 Mounting plate
- 3 RJ45 port for the graphic display terminal
- 4 Seal
- 5 Fixing nut
- 6 Anti-rotation pin
- 7 RJ45 port for connecting the remote-mounting cordset (10 m/32.8 ft maximum)
Cordsets should be ordered separately depending on the length required.
- 8 Grounding connector

Drilling a hole with a standard $\varnothing 22$ tool, as used for a pushbutton, allows the unit to be mounted without the need for a cut-out in the enclosure ($\varnothing 22.5$ mm/ $\varnothing 0.89$ in. drill hole).

Altivar Soft Starter ATS430 DTM in EcoStruxure Control Expert

DTM

Presentation

Using FDT/DTM technology, it is possible to configure, control, and diagnose the Altivar Soft Starter ATS430 directly in third party and SoMove software by means of the same software brick (DTM).

FDT/DTM technology standardizes the communication interface between field devices and host systems. The DTM contains a uniform structure for managing soft starter access parameters.

Specific functions of Altivar Soft Starter ATS430

- Offline or online access to soft starter data
- Configuration and management of cybersecurity features
- Access to threat intelligence file
- Transfer of configuration files from and to the soft starter
- Customization (My Menu, etc.)
- Access to drive parameters
- Graphic interface to assist with configuration of the ATS430 functions
- Detected error and warning logs (with timestamping)

Advantages of the DTM library in SoMove:

- Altivar-oriented software environment
- Wired connection to the Modbus serial communication port
- Standard cable (file transfer performance)
- Third-party software and download
- The Altivar Soft Starter DTM library is a flexible, open, and interactive tool that can be used in a third-party FDT.
- DTMs can be downloaded from our [website](#).

SoMove software

SoMove software for PC is used to configure, set up, maintain, and upgrade the firmware (see [page 33](#)) of the Altivar Soft Starter ATS430.

The software can be connected to the Altivar Soft Starter ATS430 via Modbus serial connection.

For more information on SoMove setup software, please consult the [SoMove Setup Software](#) catalog.

Altivar Soft Starter ATS430 ports and slots

Description

The Altivar Soft Starter ATS430 range has been designed to simplify connections to communication buses by means of the following:

- 1 Integrated RJ45 communication port for display terminal (HMI) or Modbus fieldbus
- 2 Integrated 4-way screw terminal block communication port for Modbus fieldbus

Functions

Altivar Soft Starter ATS430 functions can be accessed via the Modbus fieldbus:

- Control
- Monitoring
- Condition monitoring
- Adjustment
- Configuration

The command may come from different sources:

- Digital input or analog I/O terminals
- Modbus fieldbus
- Remote/local display terminals

As one of the advanced functions, ATS430 control sources can be managed and switched according to the application requirements.

The communication periodic I/O data assignment can be selected using the communication bus configuration software.

Communication is monitored according to criteria specific to the Modbus protocol.

The response of the soft starter to a detected communication interruption can be configured as follows:

- Freewheel stop
- Stop on ramp
- Ignore the detected error

(2) Cable depends on the controller.

(3) Sold in sets of two.

Firmware update through Modbus serial using SoMove

Firmware upload of several ATS430 soft starters at the same time through Modbus serial using Ecostruxure Automation Device Maintenance

Firmware update using SoMove or EcoStruxure Automation Device Maintenance

Presentation

The firmware of the Altivar Soft Starter ATS430 offer can be updated.

This includes:

- The firmware of the ATS430 product
- The texts and languages of the display terminals
- The firmware of the display terminals (1)

The firmware and languages are available from the [Altivar Soft Starter ATS430 page on our website](#). Using the Schneider Electric Software Update tool, notifications are automatically sent when new updates are available.

Firmware update process

There are different ways to update the firmware:

- Single product firmware update using SoMove software (2)
- Multiple product firmware update using EcoStruxure Automation Device Maintenance (3)

The update process comprises two steps:

- The first step is to transfer the firmware to the product, which can be performed when the motor is either running or stopped. The control section of the ATS430 must be powered on. The product firmware package and keypad languages can be uploaded in one operation via the Modbus serial port.
- The second step is to apply the uploaded firmware in the products: the control section must be powered on and this operation can only be performed with the motor stopped. The firmware can be applied from EcoStruxure Automation Device Maintenance, SoMove, or the display terminal.

This two-step process avoids the risk of a potential loss of usability of the product in case of incorrect operations during the firmware update process, while also reducing the amount of time the motor is stopped.

Cybersecurity-related features in the firmware update:

- The firmware is delivered with a digital certificate that is generated by a cryptographic key.
- The ATS430 checks the authenticity of the firmware before applying it. The authenticity of the firmware is also checked on each power-up.
- The firmware can only be updated and applied by a registered user with a valid user account and associated rights.
- Firmware update operations are recorded as events in the security-related reports.

Connection accessories

Description	Length m/ft	Reference
High-speed USB-A/RJ45 flashing cordset	2.5/8.2	VW3A8127
USB/RJ45 connection cable For connection between PC and soft starter Modbus serial port	2.5/8.2	TCSMCNAM3M002P
RJ45 female/female adapter For connection to plain text display terminal	–	VW3A1105

(1) Contact Schneider Electric Services to update the firmware of the graphic display terminal.

(2) Refer to [page 29](#).

(3) Download EcoStruxure Automation Device Maintenance from its [dedicated page on our website](#).

Altivar Soft Starter ATS430

Soft starters for asynchronous motors

Options: Line chokes and protective covers for power terminals

VZ1L150U170T

Line chokes

The use of line chokes is recommended in particular when installing several soft starters on the same line supply to limit low frequency interference that may affect low level loads.

The inductance values are defined for a voltage drop between 3% and 5% of the nominal line voltage.

Install the line choke between the line contactor and the soft starter.

Protective covers for power terminals

The protective covers are intended to be mounted on 140 to 590 A soft starters that have unprotected power terminals. The protective covers provide an IP20 protection rating.

Presentation

Type of coordination

The EN/IEC 60947-4-2 standard makes a distinction between two different types of coordination: type 1 coordination and type 2 coordination:

- Type 1 coordination requires that, under short-circuit conditions, the contactor or soft starter shall cause no danger to persons or the installation and may not be suitable for further service without repair and replacement of parts.
 - Type 2 coordination requires that, under short-circuit conditions, the contactor or soft starter shall cause no danger to persons or the installation and shall be suitable for further use. The risk of contact welding is recognized, in which case the manufacturer shall indicate the measures to be taken as regards the maintenance of the equipment.
- For type 2 coordination (according to IEC 60947-4-2), fast-acting fuses must be installed in series with the soft starter to provide protection for the ATS430 in the event of a short circuit. After a short circuit, the fast-acting fuses must be replaced and the contactor must be checked.

Note: Use of a short-circuit protection device (SCPD) that does not comply with the manufacturer's specification can invalidate the coordination.

Line contactor

The line contactor on the ATS430 is optional. When used, the line contactor is controlled by relay R1. There are two possibilities influencing the wiring diagram:

- R1 assigned to "Operating State Fault":
 - The line contactor is controlled by the Power ON and Power OFF pushbuttons and relay R1. Relay R1 is activated when the soft starter is powered up (minimum A1/A2 control) and is deactivated when an error is detected and the motor switches to freewheel mode.
- R1 assigned to "Line Contactor":
 - The line contactor is controlled by relay R1 on the basis of the ATS430 RUN and STOP commands. Relay R1 is activated by a RUN command (or a preheating command). It is deactivated at the end of deceleration, or when the motor switches to freewheel mode after a STOP command. It is also deactivated when an error is detected: the motor switches to freewheel mode at this point.

Thermal monitoring

The Altivar Soft Starter ATS430 will help to protect the motor and the cables against overloads. If this monitoring function is disabled, external thermal monitoring must be provided.

(1) Set I_{rm} current of the circuit breaker (when available) to a minimum of six times the current rating of the soft starter.

(2) Replace with the appropriate control circuit voltage code (refer to page 40)

(3) Type 2 coordination is only possible if the fast-acting fuses remain in the motor supply circuit and are not bypassed at the end of starting.

(1) D115 and D150 coils with built-in suppression as standard, by bidirectional peak limiting diode.

(2) Not available with connection for lugs or bars.

(3) Coils with integral suppression device fitted as standard, by bidirectional peak limiting diode.

(4) Coil with built-in suppression device as standard.

(5) For these coil voltages, choose from TeSys D Green contactors. Same product reference radical, just add BBE coil voltage code for 24 V DC, BNE for 24-60 V AC/DC, EHE for 48-130 V AC/DC, or KUE for 100-250 V AC/DC. Example: LC1D40ABBE.

Variable speed drives and soft starters

A whole world of Services for your drives and soft starters by Schneider Electric

Support and services offer by Schneider Electric

Variable speed drives and soft starters are an important part of your operation, with downtime having a significant impact on your business. Protecting that investment through comprehensive services means that you can continue to deliver optimally throughout the lifecycle of your drive and soft starter. Our range of services is designed to help you get more out of your drives and soft starters, your operation, and to improve your environmental impact.

Install

- **Extended Warranty** service helps you control your maintenance costs. Schneider Electric will provide a replacement drive and soft starter or repair the product on site during a period of one or three years more than the standard warranty, in all conditions covered by the extended warranty.
- **Start-up** service is the first essential step in maintenance and optimal operational performance of the drive or soft starter. Our comprehensive review checks up to 100 parameters and is especially designed for drives and soft starters in simple applications.
- **Commissioning** service ensures a reliable start for operations with more complex applications and drive systems. The unique requirements of your process need to be carefully considered to ensure efficient operations.

Operate

- **Preventive Maintenance** service performs predetermined maintenance actions according to a product-specific schedule. The work is carried out by certified technical experts following Schneider Electric instructions. This service minimizes unplanned downtime and extends your equipment lifetime.
- **Remote Technical Support** brings you expert product assistance over the phone, email, chat, or web for any technical questions relating to your drives and soft starters, including configuration, diagnostics, and maintenance. Our global support team is multi-lingual with support available up to R&D level experts if needed.
- **On-Site Expert Assistance** service offers you highly skilled field service experts to troubleshoot and resolve drive or soft starter equipment-related matters at your site, as a back-up source of expertise for your personnel.
- **Spare Part Management** service identifies and manages your critical spare parts either on your site or offsite. This service ensures that you have access to the spares you need without having to invest in capital to maintain the stock.

(1) Services available in countries that have the right structure and capabilities.

Variable speed drives and soft starters

A whole world of Services for your drives and soft starters by Schneider Electric

Support and services offer by Schneider Electric (continued)

Optimize

- **Training** service offers eLearning, classroom, and onsite training provision to enhance the technical installation, commissioning, and maintenance competencies of your personnel. Added competence translates into further process efficiency and reliability, as well as employee satisfaction.
- **EcoStruxure Asset Advisor** service enables you to move from reactive to predictive maintenance and access actionable insight provided by the advisor. The service predicts drive- and motor-related actions through connected devices and advanced algorithms monitored by Schneider Electric's experts.

Renew

- **Drive Revitalization** is an excellent choice if you prefer to use your aging drives longer and want to extend their service life with affordable and comprehensive inspection and replacement of all critical parts.
- **Drive and soft starter replacement** involves modernizing equipment by replacing the previous aged or obsolete product with a new one matched to the purpose. The service can be extended with engineering in case the device and process requires more advanced engineering.

Circular economy

- **Spare Parts** are available from our local, regional, and global stocks. Original equipment parts from Schneider Electric are reliable and easily available. They will help to keep your product in operation for longer.
- **Repair** allows you to extend the life of your drive or soft starter. The affected product can be replaced, or repaired on site or at our repair centers, depending on the type of product in question.
- **Fast Exchange by refurbished drive or soft starter (1)** gives a second life to inoperative drives or soft starters. In this case, we offer an immediate exchange with a replacement refurbished drive or soft starter and take back the product, repair it, and keep it ready for the next exchange.
- **Take-back and recycling (1)** is the last step to improve your environmental impact. Unrepairable products are dismantled, raw materials are collected and given a second life. Up to 85% of the product components can be recycled.

Service contracts secure recovery, availability, and outcome

Service contracts manage the safety and performance of your assets through well-defined maintenance plans tailored to your operational needs. The predefined service contract – Advantage Service Plan – and fully customizable “à la carte” service contract are built from the services in the “Operate” and “Optimize” phases and service levels defining availability, response, and lead times matching your particular needs. You will enjoy priority access to Schneider Electric support when you need it, as well as having an expert partner to plan the long-term evolution of your drives and soft starters.

mySchneider app

With the mySchneider app you have easy 24/7 access to product information and expert support. All registered users have access to additional features, such as real-time notifications, order tracking, product pricing, and availability. The mySchneider app is available for download from the IOS and Android app store.

Schneider Electric – helping you succeed

Schneider Electric, the leader in digital transformation of energy management and automation, has operations in more than 100 countries. With this global footprint we have certified field service representatives, regional expert and advanced level support up to product R&D to provide you the right support across the lifecycle of your drives and soft starters. Furthermore, we offer an extensive network of local and global repair centers and a logistics chain that underpins our ability to respond to your needs.

To order services or find out more, please contact your local Schneider Electric service center.

Legal information

The information provided in this Catalog contains description of Schneider Electric products, solutions and services ("Offer") with technical specifications and technical characteristics of the performance of the corresponding Offer.

The content of this document is subject to revision at any time without notice due to continued progress in methodology, design and manufacturing.

To the extent permitted by applicable law, no responsibility or liability is assumed by Schneider Electric and its subsidiaries for any type of damages arising out of or in connection with (i) informational content of this Catalog not conforming with or exceeding the technical specifications, or (ii) any error contained in this Catalog, or (iii) any use, decision, act or omission made or taken on basis of or in reliance on any information contained or referred to in this Catalog.

SCHNEIDER ELECTRIC MAKES NO WARRANTY OR REPRESENTATION OF ANY KIND, WHETHER EXPRESS OR IMPLIED, AS TO WHETHER THIS CATALOG OR ANY INFORMATION CONTAINED THEREIN SUCH AS PRODUCTS AND SERVICES WILL MEET REQUIREMENTS, EXPECTATIONS OR PURPOSE OF ANY PERSON MAKING USE THEREOF.

Schneider Electric brand and any trademarks of Schneider Electric and its subsidiaries referred to in this Catalog are property of Schneider Electric or its subsidiaries. All other brands are trademarks of their respective owners.

This Catalog and its content are protected under applicable copyright laws and provided for informative use only. No part of this Catalog may be reproduced or transmitted in any form or by any means (electronic, mechanical, photocopying, recording, or otherwise), for any purpose, without the prior written permission of Schneider Electric.

Copyright, intellectual, and all other proprietary rights in the content of this Catalog (including but not limited to software, audio, video, text, and photographs) rests with Schneider Electric or its licensors. All rights in such content not expressly granted herein are reserved. No rights of any kind are licensed or assigned or shall otherwise pass to persons accessing this information.
